

The Slow Living Experience

Photography by Apis Cera

We've grown accustomed to the word 'artisanal' but few times do we encounter this true definition of tradition and skill. Apis Cera is an artisanal brand specializing in eco-responsible beeswax candles and skin care, handmade in Provence.

Meaning beeswax in Latin, Apis Cera was started to bring a natural magic into the home, and provide an antidote to the often toxic and mass-produced candles on the market today.

The brand's founder, Charles, moved from Paris to Provence with his young family and created Apis Cera, making all the products himself using 100% traditional methods.

The collection of pure beeswax candles and organic beauty products made from honey is both exquisite to the eye, and in harmony with the Earth. With the classic honeycomb print and subtle honey fragrance, candles are rolled or poured into moulds by hand.

Apis Cera uses honey, beeswax and antioxidant ingredients like argan oil to create multitasking soaps (cold-processed to conserve the natural elements) and a nourishing lip balm, made with honey, shea butter and beeswax. Natural and nourishing beauty essentials to add to your daily routine.

Read on for our special collaboration with Apis Cera and how you can enjoy this made-in-France brand in your own home.
